SEEDLINGS AND TRANSPLANTS

It is our belief that the preoccupation of the ornamental nurseryman with foundation planting has caused him to neglect the production of Pines and Firs and even Spruces. There is a strong demand for such plants for ornamental use. As for Christmas trees, we have just begun to prove that plantation grown trees will replace all other kinds. There has not been an over supply of quality trees yet and we do not expect to see one. Producing good trees has required increasing skill and knowledge but the cash returns have improved correspondingly. An acre of Christmas trees can earn \$1000 +.

CREDIT AVAILABLE

We will give our buyers one, two, or three years to pay for liners, seedlings, and other prefinished stock bought from us. This credit will be treated as any loan would be. We will need information about our "borrower", will charge 6% interest, and will set our own limits on how much credit to extend. We hope by this to make it possible for competent nurserymen who are short of capital to expand their growing stock commensurate with their ability to care for it and sell it.
